

Who wants new legs for Father's Day?

Unfortunately it's too late to give my dad new legs for Father's Day... but help is at hand for anyone suffering from venous disease.

Venous reflux, the cause of varicose veins is a very common, underdiagnosed and often misunderstood medical condition. Hereditary links are very strong and symptoms include:

- Tired, heavy legs
- Aching legs
- Itchy, burning legs
- Skin changes
- Leg swelling
- Ulceration
- Thrombosis

Revolutionary new non-surgical treatments exists. Walk in walk out treatments with minimal discomfort, no general anaesthetic and minimal downtime with maximal success.
